Mechanisms of Ageing and Development
111 (1999) 225–228

mechanisms of ageing and development

www.elsevier.com/locate/mechagedev

Subject index of volume 111

Aged mice; Apoptosis; Cyclophosphamide; Immunological enhancement; Cellular proliferation **111**, 1

Ageing; Human brain; Mitochondria; Respiratory activity; Cytochrome *c* oxidase **111**, 39

Aging; Anti-apoptotic drug; (−)-Deprenyl; Parkinson's disease; Propargylamine; Dopamine neurons **111**, 189

Aging; Cyclooxygenase-2; Dietary restriction; NF-κB; Reactive oxidant species **111**, 97

Aging; Human T cells; ZAP-70; Zeta chains; T-Cell receptor signaling; Protein tyrosine kinases **111**, 49

Aging; Oxidative stress; Cerebellum; Norepinephrine; Antioxidant; Nutrition **111**, 141

Aging; Parkinson's disease; *N*-Methyl(*R*)salsolinol; (*R*)Salsolinol *N*-methyltransferase; Oxidative stress **111**, 175

Aging; Protein synthesis; Phosphorylation; Fluorography; Sex steroids; Mice brain cortex **111**, 13

Aliphatic propargylamines; *R*-2 heptyl-*N*-methylpropargylamine (*R*-2HMP); MAO-B; Neurodegenerative disorders; Apoptosis; Antiapoptotre drugs **111**, 201

Alzheimer's disease; Macrophage; Endothelial cell; Atherosclerosis; Lipoprotein metabolism; Cholesterol; Apoptosis; Host defence **111**, 107

Anti-apoptotic drug; (−)-Deprenyl; Aging; Parkinson's disease; Propargylamine; Dopamine neurons **111**, 189

Antiapoptotre drugs; Aliphatic propargylamines; *R*-2 heptyl-*N*-methylpropargylamine (*R*-2HMP); MAO-B; Neurodegenerative disorders; Apoptosis **111**, 201

Antioxidant; Aging; Oxidative stress; Cerebellum; Norepinephrine; Nutrition **111**, 141

Antioxidant enzymes; Deprenyl; Ursodeoxycholic acid **111**, 211

Antioxidants; Longevity; Hormonal therapy; Estrogen; Growth hormone; Melatonin; DHEA **111**, 73

Apoptosis; Aged mice; Cyclophosphamide; Immunological enhancement; Cellular proliferation **111**, 1

Apoptosis; Aliphatic propargylamines; *R*-2 heptyl-*N*-methylpropargylamine (*R*-2HMP); MAO-B; Neurodegenerative disorders; Antiapoptotre drugs **111**, 201

Apoptosis; Macrophage; Endothelial cell; Atherosclerosis; Lipoprotein metabolism; Cholesterol; Host defence; Alzheimer's disease **111**, 107

Atherosclerosis; Macrophage; Endothelial cell; Lipoprotein metabolism; Cholesterol; Apoptosis; Host defence; Alzheimer's disease **111**, 107

Cellular proliferation; Aged mice; Apoptosis; Cyclophosphamide; Immunological enhancement **111**, 1

Cerebellum; Aging; Oxidative stress; Norepinephrine; Antioxidant; Nutrition **111**, 141

PII: S0047-6374(99)00099-8

Cholesterol; Macrophage; Endothelial cell; Atherosclerosis; Lipoprotein metabolism; Apoptosis; Host defence; Alzheimer's disease **111**, 107

Choto-san (Diao-Teng-San); Vascular dementia; *Uncaria sinensis* (OLIV.) HAVIL.; Glutamate; Cultured cerebellar granule cells **111**, 155

Circadian rhythm; Nitric oxide; Hypertension; Urinary excretion **111**, 23

Cultured cerebellar granule cells; Choto-san (Diao-Teng-San); Vascular dementia; *Uncaria sinensis* (OLIV.) HAVIL.; Glutamate **111**, 155

Cyclooxygenase-2; Aging; Dietary restriction; NF-κB; Reactive oxidant species **111**, 97

Cyclophosphamide; Aged mice; Apoptosis; Immunological enhancement; Cellular proliferation **111**, 1

Cytochrome *c* oxidase; Human brain; Ageing; Mitochondria; Respiratory activity **111**, 39

(−)-Deprenyl; Anti-apoptotic drug; Aging; Parkinson's disease; Propargylamine; Dopamine neurons **111**, 189

Deprenyl; Antioxidant enzymes; Ursodeoxycholic acid **111**, 211

DHEA; Longevity; Antioxidants; Hormonal therapy; Estrogen; Growth hormone; Melatonin **111**, 73

Dietary antioxidants; Endothelial cell interaction; Superoxide dismutase **111**, 123

Dietary polyphenols; Oxidative stress; Sesame seeds **111**, 133

Dietary restriction; Aging; Cyclooxygenase-2; NF-κB; Reactive oxidant species **111**, 97

Dopamine neurons; Anti-apoptotic drug; (−)-Deprenyl; Aging; Parkinson's disease; Propargylamine **111**, 189

Endothelial cell interaction; Dietary antioxidants; Superoxide dismutase **111**, 123

Endothelial cell; Macrophage; Atherosclerosis; Lipoprotein metabolism; Cholesterol; Apoptosis; Host defence; Alzheimer's disease **111**, 107

Energy metabolism; Senile diseases; Superoxide; Nitric oxide; Oxygen **111**, 89

Estrogen; Longevity; Antioxidants; Hormonal therapy; Growth hormone; Melatonin; DHEA **111**, 73

Fluorography; Aging; Protein synthesis; Phosphorylation; Sex steroids; Mice brain cortex **111**, 13

Glutamate; Choto-san (Diao-Teng-San); Vascular dementia; *Uncaria sinensis* (OLIV.) HAVIL.; Cultured cerebellar granule cells **111**, 155

Growth hormone; Longevity; Antioxidants; Hormonal therapy; Estrogen; Melatonin; DHEA **111**, 73

Hormonal therapy; Longevity; Antioxidants; Estrogen; Growth hormone; Melatonin; DHEA **111**, 73

Host defence; Macrophage; Endothelial cell; Atherosclerosis; Lipoprotein metabolism; Cholesterol; Apoptosis; Alzheimer's disease **111**, 107

Human brain; Ageing; Mitochondria; Respiratory activity; Cytochrome *c* oxidase **111**, 39

Human T cells; Aging; ZAP-70; Zeta chains; T-Cell receptor signaling; Protein tyrosine kinases **111**, 49

Hypertension; Nitric oxide; Circadian rhythm; Urinary excretion **111**, 23

Immunological enhancement; Aged mice; Apoptosis; Cyclophosphamide; Cellular proliferation **111**, 1

Lipoprotein metabolism; Macrophage; Endothelial cell; Atherosclerosis; Cholesterol; Apoptosis; Host defence; Alzheimer's disease **111**, 107

Longevity; Antioxidants; Hormonal therapy; Estrogen; Growth hormone; Melatonin; DHEA **111**, 73

Macrophage; Endothelial cell; Atherosclerosis;

Lipoprotein metabolism; Cholesterol; Apoptosis; Host defence; Alzheimer's disease **111**, 107

MAO-B; Aliphatic propargylamines; *R*-2 heptyl-*N*-methylpropargylamine (*R*-2HMP); Neurodegenerative disorders; Apoptosis; Antiapoptotre drugs **111**, 201

Melatonin; Longevity; Antioxidants; Hormonal therapy; Estrogen; Growth hormone; DHEA **111**, 73

Mice brain cortex; Aging; Protein synthesis; Phosphorylation; Fluorography; Sex steroids **111**, 13

Mitochondria; Human brain; Ageing; Respiratory activity; Cytochrome *c* oxidase **111**, 39

Neurodegenerative disorders; Aliphatic propargylamines; *R*-2 heptyl-*N*-methylpropargylamine (*R*-2HMP); MAO-B; Apoptosis; Antiapoptotre drugs **111**, 201

NF-κB; Aging; Cyclooxygenase-2; Dietary restriction; Reactive oxidant species **111**, 97

Nitric oxide; Circadian rhythm; Hypertension; Urinary excretion **111**, 23

Nitric oxide; Energy metabolism; Senile diseases; Superoxide; Oxygen **111**, 89

***N*-Methyl(*R*)salsolinol**; Aging; Parkinson's disease; (*R*)Salsolinol *N*-methyltransferase; Oxidative stress **111**, 175

Norepinephrine; Aging; Oxidative stress; Cerebellum; Antioxidant; Nutrition **111**, 141

Nutrition; Aging; Oxidative stress; Cerebellum; Norepinephrine; Antioxidant **111**, 141

Oxidative stress; Aging; Cerebellum; Norepinephrine; Antioxidant; Nutrition **111**, 141

Oxidative stress; Aging; Parkinson's disease; *N*-Methyl(*R*)salsolinol; (*R*)Salsolinol *N*-methyltransferase **111**, 175

Oxidative stress; Dietary polyphenols; Sesame seeds **111**, 133

Oxygen; Energy metabolism; Senile diseases; Superoxide; Nitric oxide **111**, 89

Parkinson's disease; Aging; *N*-Methyl(*R*)salsolinol; (*R*)Salsolinol *N*-methyltransferase; Oxidative stress **111**, 175

Parkinson's disease; Anti-apoptotic drug; (−)-Deprenyl; Aging; Propargylamine; Dopamine neurons **111**, 189

Phosphorylation; Aging; Protein synthesis; Fluorography; Sex steroids; Mice brain cortex **111**, 13

Propargylamine; Anti-apoptotic drug; (−)-Deprenyl; Aging; Parkinson's disease; Dopamine neurons **111**, 189

Protein synthesis; Aging; Phosphorylation; Fluorography; Sex steroids; Mice brain cortex **111**, 13

Protein tyrosine kinases; Aging; Human T cells; ZAP-70; Zeta chains; T-Cell receptor signaling **111**, 49

Reactive oxidant species; Aging; Cyclooxygenase-2; Dietary restriction; NF-κB **111**, 97

Respiratory activity; Human brain; Ageing; Mitochondria; Cytochrome *c* oxidase **111**, 39

***R*-2 heptyl-*N*-methylpropargylamine (*R*-2HMP)**; Aliphatic propargylamines; MAO-B; Neurodegenerative disorders; Apoptosis; Antiapoptotre drugs **111**, 201

(*R*)Salsolinol *N*-methyltramsferase; Aging; Parkinson's disease; *N*-Methyl(*R*)salsolinol; Oxidative stress **111**, 175

Senile diseases; Energy metabolism; Superoxide; Nitric oxide; Oxygen **111**, 89

Sesame seeds; Dietary polyphenols; Oxidative stress **111**, 133

Sex steroids; Aging; Protein synthesis; Phosphorylation; Fluorography; Mice brain cortex **111**, 13

Superoxide dismutase; Dietary antioxidants; Endothelial cell interaction **111**, 123

Superoxide; Energy metabolism; Senile diseases; Nitric oxide; Oxygen **111**, 89

T-Cell receptor signaling; Aging; Human T cells; ZAP-70; Zeta chains; Protein tyrosine kinases **111**, 49

***Uncaria sinensis* (OLIV.) HAVIL.**; Choto-san (Diao-Teng-San); Vascular dementia; Glutamate; Cultured cerebellar granule cells **111**, 155

Urinary excretion; Nitric oxide; Circadian-rhythm; Hypertension **111**, 23
